KITCHEN SINKS**

WELCOME TO THE EURODOMO EXPERIENCE.

A renowned European brand, Eurodomo offers a wide range of kitchen appliances, sinks and accessories with high quality and modern design at affordable prices. For the last 15 years, Eurodomo has been crafting high-quality and innovative products for more than 35 countries across the globe.

Headquartered in Switzerland and loved across the world, Eurodomo is globally known for:

Excellent quality
Design and functionality
Easy installation, and
The best price : quality ratio

If you want harmony and functionality, Choose Eurostone Kitchen Sinks

The extraordinary range of Eurostone kitchens combines aesthetics and practicality in their selection of Kitchen sinks

Eurostone sinks offer a variety of styles and colors adapting to any type of kitchen.

From classic to contemporary styles, designers Eurostone pays attention to details, ergonomic and easy to clean.

EUROSTONE:

Europe's finest Colored sink material.

Eurostone is an extremely hard-wearing material created by using real quartz (the most durable component of granite; the fourth hardest natural material known to man) mixed with a highly-durable acrylic resin.

Durability/ Design & Interaction / Hygiene & cleanliness

Durability:

~75% - 80% natural quartz

The 4th hardest material in the world after Topaz, Ruby and Diamond
Comes from a high quality quarry at the Black Forest in Germany

~20 - 25% acrylic resin

Manufactured in house
Makes the colours bright with its glass look and feel.

Colour pigment is 'merged' with the quartz in a 600°C kiln (rotating oven)

The pigment is chemically bonded to individual quartz particles to give accurate colour matching and consistency. **"MADE IN GERMANY"**

- The colours never fade from the material
- The colours cannot be scratched away from the surface

eurodomo[®]
simply more kitchen.

ADVANTAGES OF EUROSTONE:

Eurostone is a Hard Face Acrylic Granite, this means that the working surface of the sink has a very high density of quartz particles.

Eurostone Core Section

High density of particles means the substrate is hard and is highly resistant to scratches, abrasion and chemicals.

Other popular acrylic granite sinks use the 3D methodology, which means that the quartz is spread more evenly throughout the material.

Other Popular Brand Core Section

Even distribution of particles means the substrate is soft and can be more easily damaged by scratches, abrasion or chemicals.

DESIGN & INTERACTION:

Neutral COLOUR Options :

- Pallet to match Interiors layouts of all types
- Higher aesthetic appeal.

Decorative shape with clear Geometries.

It distinguishes itself through the drainer pattern and the stainless steel coupler. The minimal radius of the corners gives contemporary feel to the sink while ensuring ease of cleaning after use. Thanks to the large bowl, it is possible to accommodate a larger number of dirty vessels and dishes.

HYGIENE & CLEANLINESS:

Germ guard Coated Surface

- The silver ions are homogeneously distributed throughout the matrix
- These silver ions ensure that sink surface is free of microbial contamination at all times.

The silver ion locates the bacteria via the moisture and deactivates it.

eurodomo[®]
simply more kitchen.

WARRANTY:

All Eurodomo Eurostone kitchen Sinks are Guaranteed for 5* Years against faulty workmanship and materials

* **Conditions Apply:** Company Reserves the Rights to accept and decline any warranty claims.

BENEFITS OF OWNING EURODOMO EUROSTONE SINKS:

Scratch-Proof (Resistance)

International Standard Quality

Chip & Crack Resistance

Hygienic

High caliber Durability

Maintenance-free

Life-like Colours

Full-Body Non-porous material

Time-proof Beauty

High Point Load Strength

Heat Resistance

Water-proof

Easy Clean

Noiseless

Stain Free

Antibacterial (Resistance)

DISCLAIMER: The overall sizes & bowl sizes indicated are in mm and inches, Which are rounded off to the nearest decimal. For Granite Cutting please refer the dimensions from actual product only. Franke will not be responsible for any mistake during granite cutting. Franke reserves the right to alter models, prices and specification without any prior notice.

Pictorial representation may not be identical to actual product.

Installation of the sink Preparing a new countertop

Trace the sink outline on the countertop (do not cut along this line).

Draw a line 1 cm inside the sink outline.

Measure the cut-out line you just drew and compare to all dimensions (double check)

Using a 2" hole saw, Drill a pilot hole inside the cutting line.

Using a jigsaw, cut along the inside line to cut the opening in the countertop.

With sink in the upside down position, place a continuous and generous bead of silicone sealant around the entire perimeter of the rim. This serves as a watertight seal.

Lift sink, turn face up and lower into the countertop cutout opening. Wipe excess sealant from perimeter with a wet cloth

DRILLING TAP HOLE
Invert the Sink, Use the marking to Drill the Hole with Wood Cutting Bit
